

Benefits of an Akuvox Integration

A property's front door sets the tone for everything that follows. Lost fobs, replacement cards, and visitors buzzed in by the wrong resident all land on the same desk: the leasing office, or the integrator who gets the call when something goes wrong.

That's where an ICT and Akuvox integration comes in.

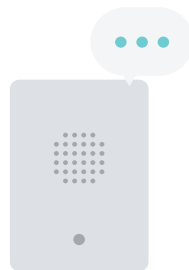

Facial recognition, PIN and card sit on the same door phone, and Protege GX still makes every access decision behind all of them.

Key Features

Streamlined Operations

Manage users and sync facial recognition credentials directly within Protege GX. No duplicate records, no separate app.

Improved User Experience

Give residents and tenants a face-first way through the door, or fall back to PIN or card on the same Akuvox terminal.

Enhanced Security

Akuvox door phones combine facial recognition, PIN and card on one device, while Protege GX still makes the access call.

Supported Features

- > Enroll users and sync their facial recognition credentials directly in Protege GX
- > Supports dual authentication using ICT credentials and Akuvox door phones and terminals
- > Validated against three Akuvox models within their broader lineup: the E16C, X912K and A02
- > Optional consent tracking before a photo is synchronized to the terminal

Who we are

We believe in the confidence and peace of mind that comes from a feeling of true security.

“ My vision is to make access, intrusion, and automation easy for our customers. A lot of security products are complicated and only offer one service. Our driving idea is that you create success – and value – when you combine them into a unified solution. - **Hayden Burr, Founder & Chief Innovation Officer, ICT.** ”

Integrated Control Technology (ICT) is an award-winning global manufacturer of security solutions. For more than 20 years, ICT has led the way with their unified systems for access control, intrusion detection, and building automation.
